By the Furnaces Leads to the Installation of New Type of Cokens by All
that Three of the Operating Companies. The State of the Operating Companies. The Operating Companies of the Operating Companies. The Operating Companies of the Operating Companies. The Operating Companies of the Operating Companies of the Operating Companies of the Operating Companies. The Operation of the Opera

bechive ovens, the Republic Steel & From an Association for the Dissemilbama Company about 200.

These three last named from companies are the only ones in the district which have not erected by-product games of by-product coke ind an aisovers, but all have very seriously considered the matter of installing them, it is said.

At present rate of production of pignion in Alabama it will require practically 4,400,000 tons of coke to supply the stacks that are in operation. The year 1913 was the banner year in coke production for the state, there having been more than 3,500,000 tons produced, if every bechive oven it the state were available today and being pushed to its capacity there could not be produced more chan 3,400,000 tons per oven per amum can be produced. On this basis 1,000 by-product coke ovens would amply supply all the coke needed to keep up present day production to the recovery of the local by-product coke ovens would amply supply all the coke needed to keep up present day production to the recovery of the local by-product coke and bloom of pig-iron.

In addition to the recovery of the local as Coke Company, Roston, A anable to the recovery of the propose of disseminating information.

ed to keen up present day production of pig-from.

In addition to the recovery of the usual by-product from the coal gases the Woodward from Company enceled a benzel plant with capacity of 2,000 gallons per day when its that bottery of by-product coke ovens was installed. With the installation of the second battery the Edison Company erected a benzel plant at Woodward with a capacity of 13,000 gallons per day, and with the completion of the by-product covens by the Tennessee Coal & from Company at Pairfield a benzel plant of 15 one gallons per day enpacity was erected alongside the ovens.

In spile of the heavy cost of installation of these by-product corns and allied plants, funder managers self-installation of these by-product acons and allied plants, funder managers self-installation of these by-product ovens and allied plants, funder managers self-installation of these by-product ovens and allied plants, funder managers self-installation of the fact, then there is a fully repays all the cost of making color, if this are a fact, then there is a fundamental plants for the distribution in cost per fant of iron of \$2 to \$2.25 ner for from the 1915 was produced by any stylellations.

Mines on Strike.

PICTSECTION. Feb. 10.—Nine hims dred miners employed in three mines of the Ford Collierus Company at Calmerville, near hire, struck today for enforce a demand that the company reduce the price of powder from tomance extremes a buckage.

Connellsville Central Coke Co.

General and Sales Office, 1211 Empire Building, Pittsburg, Penna.

Standard Connellsville Coke

MONTHLY CAPACITY 32,000 TONS. P. R. R., P. & L. E. R. R. and B. & O. R. R. Connections

Cake low in Sulphur and Phospherus and of strong physical structure.

'Our Cake at HERHERT WORKS is made in LONGITI DINAL OVERS and is entirely mechanically handled, thus eliminating by screening all dust and dirt.

ANALYSIS FURNISHES ON REQUEST

Graceton Foundry Coke

Our Foundry Coke is an excelled by any. Its low sulphur and ash and high fixed carbon make it superior to many. It has the ability to give high melting ratios in your foundry.

GRACETON COKE CO. Graceton, Penna.

The **W**eekly Courier.

Entered as second-class matter at the postoffice, Conneilsville, Po. THE COUNTRY CO., Publishers. M. P. SNYDER, President and Managing Editor. Office, The Courier Bulliling, 127 % W. Main Street, Conneilsville, Pa.

especially if the coal is further developed. It is not everybody who can bid on a property of the size and value of the Isabella Connellsville coke plant. But we have no doubt there will be biddiers and possibly lively bidding. The Connellsville coke region is of well defined area and limited extent, and as first stated the Isabella property considered in its quantity and quality is a royal possession.

Lieans The World.

When the Iron Trade Review says that "Steel manufacturers of the United States have always paid the It is incapable of causing any damage highest wages in the Iron Industry of It will be paraded for the purpose of

highest wages in the from industry of it will be paraded for the purpose of the world, and have never hestated frightening the Republicans into some the world, and have never hesisted frightening the Republicans into some about sharing the profits with their concessions which they would not personally an advances by groing them advances have make in their ecliner moments. It ought to be freely understood that and economic conditions wherever the Republican party is holding it of the profit and propriety could have also been applied to the treatment as interes which is the free blown of the companies of the Connells like individuals and the state of the companies of the Connells like the majority of the delegates. The first blown of the freedom of the companies of the Connells like the majority of the delegates.

choice of a imparity of the deligates.

As in steel and from trades so the wages of colde workers have been the digital of the Republican purty alghest of similar classes of labor in the world. And in the Connellswille rewages of code workers have been the alignest of similar classes of labor in the world. And in the Connellsville region it may be truthfully said that earliest recognition was given to the underlying principles of improved to did in the various forms of welfare work and the various forms of welfare work and the various forms of welfare work and the systematic and intelligent application of the rules and practices are stronger, but cars and mention of the rules and practices are stronger, but cars and mentics which practices are stronger, but cars and mentics are strenger, but cars and mentics of the rules and intelligent applications of the rules and practices are stronger, but cars and mentics which either which practices are stronger, but cars and mentics with the cohe trade is not always what it ought to be, but its conditions of the rules and the diffusion of the rules and the cohe region where it was fathered by the late Thomas Lynch.

The highest standard in working conditions and in wages have been always what it consists who are selling the bulk of their region since that decirine was first content of the present of the p

DWARPS AND GIANTS.

The Government threatens to probe the Midvalo steel merger. The Congress proposes to put the company out of the armor plate business and not permit it to expand by acquisition in other large. in other lines to a larger industrial unit. The Democratic notion is to dwarf our industries. The world's business is not going to be done dwarfs, but by guints. The American policy of Preparedness should reconize this fact, too.

There is not much sale for Greene county coal, but when it is offered there are always takers.

A POWER CENTER.

THE EXPLOSION AT ERNEST MINE

The Dutch government has taken over the distribution of all coal in the Netholands. The matter is under the control of what is known as the State Coal Distribution and Advisory Committee. Coal may be imported out the importers must sell it under the importers must sell it under the incident to prevent specula lon and the undue increase of prices to the small consumer.
